VT Series

FOR ORCHARDS AND VINEYARDS WITH DIFFERENT ROW WIDTHS

Especially designed for orchards and vineyards with different row widths, our VT series rotary mowers have two main blades the overlap of which can hydraulically be adjusted for stepless variable working widths.

The linear width adjustment system in combination with the direct gearbox drive allows for a compact and extra sturdy design.

For professional maintenance in orchards. High working speeds and maximum capacity. Strong reduction / ha.

VT SERIES

Linear adjustable cutting width

To prevent from overloads the standard configuration includes a PTO shaft with overload protection clutch. The direct drive system allows for high working speeds, even in higher grass.

To ensure long life and minimum maintenance the sliding frame sections are provided with interchangeable wearing plates.

EXCELENT CUT AND GRAS DISTRIBUTION

The cut material is evenly distributed behind the machine over its full working width or can, if required, be spread to the left and right hand side of the machine on the tree strips. Swing away blades, for better protection against stones or other obstacles are standard.

EXTRA'S

- Hydraulic offset feature
- Tandem roller
- Full rubber front wheels
